

Employer-in-Residence Program

Career Education and Development's Employer-in-Residence program provides employers who visit Stockton University the opportunity to share expert knowledge about careers in their industries; prepare students for the networking and job search process through one-on-one and group interactions; offer career advice to students seeking career direction; and build relationships with constituents in the campus community.

Spend anywhere from a couple of hours to a full day on campus. We are happy to create a schedule for your visit and have found that the best time to visit campus is within the few weeks leading up to our career and internship fairs. During your visit, we are happy to provide you with a private office, Wi-Fi access and a complementary lunch.

Potential opportunities to connect with the Stockton community:

- Conduct one-on-one resume reviews or mock interviews
- Visit classes and share your college/career story and company information
- Prepare students for career and internship fairs by facilitating career fair prep seminars
- Facilitate workshops and presentations to student organizations
- Create brand recognition for your company through informational tabling in high volume traffic areas across campus
- Network with faculty and campus administrators

Policies:

All employers participating in this program are expected to abide by the Career Education and Development's [employer guidelines](#).

Contact Information:

The Career Education and Development office operates from a Career Community model – please contact the advisor whose community most directly relates to your organization's company or field. A full description of each community can be found [here](#).
