Methodology

Interviews were conducted at the Stockton Polling Institute by live interviewers calling from the Stockton College campus. The poll was conducted with 626 likely voters from Oct. 17-20, 2013. Respondents qualified as likely voters if they said they are registered to vote in New Jersey, voted in the November 2012 general election, and are likely or almost certain to vote on Nov. 5. Interviewers called both land lines and cell phones. All prospective respondent households in the source telephone list have the same chance of joining the sample because of random selection. The survey has a margin of error of +/- 3.9 percent at 95% confidence level. Data is weighted based on United States Census Bureau demographics for the 2nd Legislative District population.
