<td>&quot;The 150th Anniversary of Women's Participation in the Legal Profession in the United States: Historical and Contemporary Perspectives.&quot;</td>
<td>Business</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>The legal and cultural barriers that confronted 19th century American women with respect to obtaining entrance to the legal profession were onerous. According to a noted scientist of the era from Thomas Jefferson University School of Medicine, women had heads &quot;too small for intellect, but just big enough for love.&quot; In the inimitable language of the U.S. Supreme Court, women's &quot;natural and proper timidity and delicacy&quot; rendered them unfit to pursue the profession. While the 150th anniversary is celebrated, the contemporary effort to achieve equality in the legal arena continues to address issues regarding sexual harassment and gender discrimination.</td>

Engaging Students in Community Research: First Year Impact of COSI Project

The overarching goals for the COSI Project are to help undergraduate students begin to perceive of themselves as scholars and researchers. By teaming up with a Community Partner, students learn about how to conduct community-engaged research work and find opportunities to present their work in professional settings.

Intercultural Crisis Communication Case Study: Analysis of the Reactive Relationship Management and Conflict Positioning Strategies for H&M Marketing Campaign Crisis

This intercultural case study research examined and analyzed the consumer relations management process of H&M “Coolest Monkey in the Jungle” 2018 marketing campaign crisis. H&M corporation’s racial conflict positioning strategies and brand imaging recovery tactics were critically evaluated by adopting the ROSTE public relations model. Research findings suggest a multinational corporation should follow essential procedures to strategically respond to consumer activism and appropriately manage racial conflict during and after an intercultural marketing campaign. Corporations should incorporate diversity and inclusivity policies to further extend and practice their corporate social responsibilities.

The Legacy of Segregation and Redlining in Atlantic City

The goal of this project is to describe the social and economic penalties in Black urban neighborhoods like the Northside in Atlantic City caused from past exclusionary residential efforts like redlining from the point of view of older residents. (This project was supported, in part, with funding from the Stockton Center on Successful Aging Faculty Research Scholars program.)

REIT Dividend Payout: Evidence from Asia Market

Previous studies of real estate investment trust (REIT) on dividend policies have focused primarily on REITs listed in the United States (U.S.). This study focusses on the new emerging REITs market to examine the determinants of REITs dividend payout (selected from five regions in Asia). The preliminary findings demonstrate that the dividend payout level for these REITs is negatively associated with returns on assets which support the agency cost theory.

Technology and Ethics: Implications for Social Work

The social work profession is known for adapting to and addressing psychosocial and environmental changes. This presentation will address the newest area to which social work is responding: the use of technology in ethical professional social work practice, education, and research.

<td>The Lived Experience of Parenting the Rainbow Baby in the NICU Post Perinatal Loss: Preliminary Findings</td>
<td>Purpose: to present the preliminary findings from a phenomenological study investigating the experience of families who suffered a perinatal loss prior to parenting an infant hospitalized in a Neonatal Intensive Care Unit. Co Investigators: Ann Coyle, RN, and Stockton Alumna Erin Schermerhorn, RN, BSN – Co Author: Maria Caccavo, RN, BSN</td>
</tr>
<tr>
<td>CC3</td>
<td>Kaiser, Elma – SOBL, Jessica Potapa</td>
<td>Minority Female Student’s Learning in the Current Political and Social Environment: Looking Through Intersectionality Theory</td>
<td>This qualitative research project explores the experiences of female, minority students in the current social, political, and institutional environment. Having Intersectionality theory guiding this study, it also helped understand how the mutually constructing features, i.e. race, ethnicity, religion, gender, age shape these female students’ experience.</td>
</tr>
<tr>
<td>CC4</td>
<td>Kubricki, Stephen – BUSN, Mackenzie Ade, Steven Flynn, Anastasia Hultquist, Owen Nowalsky, Isabella Scheper</td>
<td>The Impact of Socio-Economic and Other Factors on Water Quality</td>
<td>The goal of this project was to determine if socio-economic and other factors have an impact on the water quality in NJ Public Schools. The statistical analysis of the data revealed a significant relationship between socio-economic and other factors and the quality of the water in NJ school districts. Partner: Patricia Naples</td>
</tr>
<tr>
<td>CC5</td>
<td>Cydis, Susan – EDUC, Shelly Meyers – EDUC, Priti Haria – EDUC</td>
<td>The impact of experiential-based learning in improving essential skill competences.</td>
<td>The pilot study focuses on the impact of experiential-based learning in improving essential skill competences (e.g., critical thinking skills, creativity) for nine pre-service teacher candidates. The data indicates that working directly with public school teachers and school-age students not only helped pre-service teachers to make connections between theory and practice, but it also improved their essential skill competences.</td>

</table>
Assessing Outcomes for Short Term International Faculty Led Programs

This presentation will focus on reviewing the various measurement tools available to assess outcomes of short-term international programs. Tools that measure cognitive outcomes, beliefs and affective responses, and the behavioral change of students will be presented, and discussion will consider how assessment can be conducted across disciplines in a systematic manner.

Health and Social Service Needs of LGBTQ+ elders in South Jersey

This research project consisted of focus groups with older LGBTQ+ adults in Southern New Jersey, to explore primary social service and healthcare needs, both now and in the future. Data are being used as part of a statewide needs assessment of LGBTQ+ older adults. This project was funded by SCOSA.

Pre-Service Teacher Beliefs About Phonics Instruction and their Decisions for Beginning Reading Practices

Phonics, the ability to associate letters with sounds, is a well researched component of effective reading pedagogical practice, and teacher beliefs about classroom phonics implementation plays an important part in its success. This presentation will demonstrate a research study design that includes pre-service teachers in a one-semester literacy development course, and looks to determine their evolving beliefs about phonics instruction, along with their plans for future reading instruction.

Hate Crime Over Time by US State

The purpose of this research is to examine the manifestation of hate crimes in the US using officially recorded data from 1991 to 2017 by US state against varying political and social contexts. Further, an additional outcome will be to examine the contents of the Uniform Crime Report hate crime data and the crimes themselves.

Digital Pan-Africanism in Contemporary African American Travel Discourse

This study utilizes digital Pan-Africanism as new theory to examine the significant role that online publications and web-based communities can play in building and maintaining diasporic networks between Africans throughout the diaspora and explores its potential for asserting African agency and achieving structural, political and ideological freedom for humanity.

A Mile in Our Shoes: HIV/AIDS Stories from Atlantic City

A Mile in Our Shoes: HIV/AIDS Stories from Atlantic City is a project that allows the voices of a hidden population, those living with HIV/AIDS in our local community to speak. The Project highlights the importance of the medical anthropological perspective, one that allows the recounting of the experience of illness. This lens allows us to see the structural violence which determines the nature of these experiences, and the way that the stigma of HIV/AIDS is the principle cause of suffering, rather than the virus itself.

Using Guided Critical Reflection to Unlearn and Learn

Critical reflection through journaling and collaborative discussions is a powerful augmentation to other classroom activities used to enhance student experiential learning. This project discusses how to engage students in guided critical reflection activities to enhance their unlearning, learning, growth and efficacy in a subject area.
| 12:05–1:00 | CC5 | Rosenthal, Gail – GEN S Cassidy Hoff Ryan Frost Brianni Martinez | Rescue, Resistance, and Resilience During the Holocaust  
*The history of the Holocaust always includes the life stories and choices of the perpetrators, victims, and bystanders. Often the role of those who resisted during WWII through acts of rescue and resilience are not included. Three students will highlight the rescue efforts of Irena Sendler and Janusz Korczak, Acts of resilience at the 1936 Olympics in Berlin will also be shared.* |

| 12:35–1:00 | CC1 | Calicdan-Apostle, Guia – SOBL April Roork Desirae Tor-Agbidye | Infographic as an Effective Multimodal Learning Tool for Advocacy  
*Students in higher education are often required to apply higher-level thinking skills when writing papers. To demonstrate critical thinking and reflexivity, students in Advanced Cultural Competence wrote an assignment on heritage and power. They examined their cultural background and identified ways of empowering their clients through the use of infographics.* |

| 12:35–1:00 | CC3 | Madan, Manish – SOBL Taylor Searles | Sexual Harassment: Psychological Response and Coping Mechanism among College Students  
*This study examines the long-term psychological distress symptoms and coping mechanisms within the students who have reported experiencing sexual victimization (lifetime or in the past 12 months). Specifically, this paper analyzes relevant gender differences and differences within the class status (freshmen to graduate students). This research also categorizes an individual's response immediately post-victimization (e.g., avoidance, hyper-arousal, self-harm, or re-experiencing symptoms). Manish Madan is a credited partner for this project.* |

| 12:35–1:00 | CC4 | Fotia, Dennis – Ctr for Learning Design | Using Formative Assessment and the Blackboard Grade Center to Improve Student Retention and Success.  
*This presentation focuses on the use of formative assessment and the Blackboard Grade Center to assess student progress and improve student retention and success. The presenter used a formative assessment survey in weekly learning modules in an online course and monitored completion of the survey and communicated more frequently with students observing improved student progress, retention, and success.* |

- *Calicdan-Apostle, Guia is the presenter.*
- *Galantino, Mary Lou is the presenter.*
Does aquatic therapy alone or in addition to physical therapy enhance the quality of life of pediatric patient with cerebral palsy?
The goal of this clinical question was to determine if aquatic therapy in addition to physical therapy would enhance the quality of life of a pediatric patient with cerebral palsy. The research revealed improvement in quality of life with the incorporation of aquatic therapy in addition to physical therapy. However, due to limited studies more research is needed.

Impact of Blood Flow Restriction therapy with Low Load Resistance Training on elderly patients with sarcopenia?
Our main research goal was to determine the benefits of utilizing Blood Flow Restriction Therapy for individuals with sarcopenia and compare these results to traditional methods of therapeutic exercise. Overall, low load resistance training with Blood Flow Restriction Therapy can produce an equal effect of strength and hypertrophy gains compared to high load resistance training for older individuals with sarcopenia.

Meditative Movement Therapies & Fibromyalgia in the Knee Osteoarthritis Population
The literature is conclusive in suggesting that Meditative Movement Therapies (MMTs) should not be discounted in the treatment of persons belonging to the Fibromyalgia (FMS) population. These therapies should be used in conjunction with traditional methods of treatment.

Implications of Prehabilitation for Total Knee Arthroplasty and Regenerative Medicine
Does a prescribed prehabilitation program improve the outcomes of patients with knee osteoarthritis undergoing total knee arthroplasty compared to those who did not have a prehabilitation program? Can the literature inform changes in outcomes through prescribed pre-operative exercise (prehabilitation), for patients using regenerative medicine to treat knee osteoarthritis?
Based on the research our group found stem cell therapy to serve as a safe and beneficial treatment option in the population of patients with knee OA. Prehabilitation is a construct excluded from stem cell treatment and thus we pose inclusion as it may progress advancement in the field of regenerative medicine.

Putting Pieces in Place: The Graduate Jigsaw Classroom
This graduate jigsaw classroom provides a safe space for learning, understanding, applying, and integrating foundational knowledge required for clinical practice. This self-directed learning strategy promotes levels of critical thinking, information literacy, teamwork and interdependence, and personal responsibility that traditional lecture learning does not accomplish.
**Textbooks or Food: Students, Financial Hardship, & OERs**

*Goodnight, Christy – Library*

*Jeitner, Eric – Library*

*Jessica Klein*

This poster advocates for wider adoption and use of open educational resources (OERs) in higher education and reflects the financial impact that traditional textbooks have on Stockton University students. OERs are textbooks & other resources that replace traditional textbooks & paid access to course materials.

**Emerald Ash Borer and Spotted Lanternfly Surveys at NJARNG and NJDMAVA Facilities**

**Hallagan, John – NAMS**

*Gregory Fischer*

*Tait Chirenje – NAMS*

The goal of this project was to identify NJ Army National Guard (NJARNG) and NJ Department of Military and Veterans Affairs (NJDMAVA) facilities with Emerald Ash Borer (EAB) and/or Spotted Lanternfly (SLF) infestations. Results from these surveys were compiled into a formal report, including recommended action plans, maps, and photographs, which NJDMAVA will use to make educated pest management decisions at 34 properties throughout the state. This project took over 12 months to complete, including initial survey protocol development, fieldwork execution, data analysis, and report writing.

**Project-Based and Experiential Learning**

**Holtzman, Diane – BUSN**

*Ellen Kraft – BUSN*

Goals: 1) to explain the role of experiential and project-based learning (PBL) in classroom assignments that engage students in learning; students apply their knowledge gained from research, discussions and readings to realistic workplace situations 2) to illustrate the projects in experiential and PBL presented in the graduate level Marketing Communication and Social Media class and the undergraduate Risk Management and Insurance class.

**Highly Efficient, Rare-Earth-Free Sn(IV) Complexes for Potential Organic Light Emitting Devices**

**Ki, Wooseok – NAMS**

*Kathleen Ngo*

Rare earth metal organic complexes have been widely developed for efficient organic light emitting diodes (OLEDs) because of their tunable optical and electrical properties. However, rare earth element-based phosphors are expensive and in limited supply. For this reason, efficient rare earth free metal complexes have brought much attention. Recently we have developed new cost-effective, efficient Sn (IV) complexes, which exhibit green emission applicable in the fabrication of organic light emitting devices.

**An Exploratory Study of Graduate Social Work Programs to Identify Methods Utilized in Teaching Students Culturally Competent Practice**

**Lewis, Jack – SOBL**

The goal of this project was to examine methods utilized by graduate schools of social work to teach cultural competent practice to master social work students utilizing diversity content. This project provides limited information about specific methodologies that graduate schools of social work utilize to teach students the provision of culturally competent practice. This study also provides implication for continued research in this area on a broader scale.
| Ludan, Lia – HLTH | **Chronic Pain Education of Adults in the Emergency Room**  
*The purpose of the study was to educate registered nurses and emergency room nurse practitioners on how to treat and manage patients presenting with chronic pain, as well as to evaluate the perceived knowledge and responses to the educational program on chronic pain in the acute care settings.* |
|---|---|
| *Manson, J. Russell – NAMS*  
Robert R. Ford | **Episodic disruption, stream physics and metabolism in Northern Italy’s Venetian Plain: a field experiment and theoretical analysis**  
*Data gathered from a “biologically active” tracer study is analyzed by a new mathematical model to elucidate stream physics and metabolism. [Credits: Professor Andrea Marion and Eleonora Dallan, University of Padua]* |
| *Olson, Kory – ARHU*  
Christian Adams | **South Jersey’s Huguenot Settlers: The De Cou Family**  
*The goal of this project as a whole has been to detail and uncover the history of huguenots (French Protestants) as they came and settled in New Jersey. Presented will be findings on the De Cou family, including their escape from persecution in France, dealings with William Penn, and their eventual impact on our area.* |
| *Prakash, Sreelekha – HLTH*  
Jane Ryzhik | **Disabilities in Older Adults**  
*Observing Disabilities in Older Adults through a qualititative approach and comparing it to existing data. The data will be analyzed based on ADLs (activities of daily living) and IADLs (instrumental activities of daily living).* |
| Sharon, Yitzhak – NAMS | **Systematics of the Ratio R of the Nuclear Electric Quadrupole Moment, Q(2), to the Square Root of the Reduced Transition Probability, B(E2;0→2).**  
*The experimental value of R was investigated for all even-even nuclei. R is close to unity for each of the rotational rare-earth nuclei, as expected; for non-rotational nuclei, the absolute value of R is almost always considerably smaller than unity.* |
| Tourtual, Jill – HLTH | **The Relationships of Parental Self-Efficacy, Parental Locus of Control, Children’s Health-Promoting Behaviors, and Childhood Obesity**  
*The purpose of this study was to explore the relationships among parental self-efficacy (PSE), parental locus of control (PLOC), children’s health-promoting behaviors (CHPB), and children’s weight group (healthy, weight, overweight, and obese).* |
| *Trout, Joseph – NAMS*  
Colleen Lindenau  
Courtney Weber  
Gracie Buondonno  
Briena Feltner | **Fourier and Wavelet Analysis of Light Intensity Spectra of Stars**  
*This poster demonstrates our research on analyzing the light intensity spectra of stars with data provided by the Kepler Space Telescope. We analyzed the stellar light curves using Fourier Analysis and Wavelet Analysis.* |
